PACKAGED NAIL & SCREW PROGRAM

WOOD PRO

By B&C Eagle

We offer a wide range of screws in 1lb and 5lb buckets, along with bulk boxes. We have planogram offerings from 4ft to 16ft ready to ship. We can tailor any WoodPro planogram for each unique market. If a specific fastener does not perform well in your market, we'll fill the planogram with a fastener that does. Our packaging has a bright full color label and transparent plastic so your customers know what's in the bucket before they make a purchase.

PPG E-COAT, WHY IT'S BETTER

PPG E-Coat is superior to other types of coating because it allows for a thinner coat while still maintaining over 1,000 hours of salt spray protection. The thinner coating provided by PPG also eliminates recess and thread fill so you know your bit will always fit securely. The coating is extremely durable in all weather applications and will not chip or rub off. PPG coating is rated for use in treated lumber.

MARKETING SUPPORT

With each planogram sold, we send out a header card that helps your customers choose the correct screw for their project. This card is 44" x 10" in size and can be mounted in various ways depending on your stores layout. It has relative screw coating information, graphic photos of applications and other information that will help them choose the right screw.

ALL PURPOSE SCREWS (INTERIOR/EXTERIOR)

WoodPro All Purpose Screws are coated by PPG Industries with a superior 1,000 hour Electro-Polyseal coating for consistent layering that prevents recess fill while offering superior corrosion protection. The secure STAR drive helps reduce bit slippage and a sharp Type-17 point provides quick starting and effortless drilling. Special nibs under the head provide a clean countersink in all types of material. For interior and exterior use.

PHOSPHATE COATED DRYWALL SCREWS (INTERIOR)

WoodPro Drywall Screws are phosphate coated and offer minimal corrosion protection. Our Drywall screws feature a coarse thread that helps prevent pop-out. A sharp Type-A point aids in quick starting and effortless drilling. These screws are for interior use only and should not be used in treated lumber.

WASHER HEAD SCREWS (INTERIOR/EXTERIOR)

WoodPro Washer Head Screws are coated by PPG Industries with an industry leading 1,500 hour Electro-Polyseal coating for consistent layering that prevents recess fill while offering superior corrosion protection. The stronger PPG coating helps prevent chipping for added exterior corrosion protection. The secure STAR drive helps reduce bit slippage and a sharp Type-17 point with a patented ASTER thread provides quick starting and effortless drilling.

COMPOSITE DECK SCREWS (EXTERIOR)

WoodPro Composite Deck Screws are coated by PPG Industries with a superior 1,000 hour Electro-Polyseal coating for consistent layering that prevents recess fill while offering superior corrosion protection. The secure STAR drive helps reduce bit slippage and a sharp Type-17 point provides quick starting and effortless drilling. Dual threads prevent mushrooming while the color matched PPG coating conceals the fastener.

WOOD PRO

By B&C Eagle

We offer a wide range of hand driven nails in 1lb and 5lb boxes, 30lb plastic buckets and 50lb bulk boxes. We have planogram offerings from 4ft to 16ft ready to ship. We can tailor any WoodPro planogram for each unique market. If a specific fastener does not perform well in your market, we'll fill the planogram with a fastener that does. All WoodPro packaged nails meet or exceed all applicable ASTM codes.

MARKETING SUPPORT

With each planogram sold, we send out a header card that helps your customers choose the correct fastener for their project. This card is 44" x 10" in size and can be mounted in various ways depending on your stores layout. It has relative fastener coating information, graphic photos of applications and other information that might help them choose the right fastener.

COATING INFORMATION

Bright Finish — For interior use where no corrosion protection is needed. Not for use in ACQ or other treated lumber. Meets or exceeds all ASTM specifications, when applicable.

Electro Galvanized (EG) — Minimal corrosion protection for use in areas that need mild corrosion protection. Not for use in treated lumber. Meets or exceeds all ASTM standards for zinc coating weight when applicable.

Hot Dip Galvanized (HDG) — Premium corrosion protection, acceptable for use in ACQ and other types of treated lumber. Meets or exceeds all ASTM standards for zinc coating weight when applicable.
